

Item # INT01

One Device. Three Solutions. InstaFlow. Cleaning. Degreasing. Sanitizing.

Solutions from GenEon Technologies' innovative InstaFlow allow users to generate the right solution for the job every time. The flexible InstaFlow can be either wall or cart mounted depending on the user's need. It is also eliminating the need for dilution and for having staff mix or work around harmful chemicals. The InstaFlow generates solutions for cleaning, degreasing, and sanitizing/disinfecting without toxicity and without breaking your budget.

Why the InstaFlow?

- ✓ Truly sustainable cleaning
- ✓ Reduces cost
- ✓ Increases safety for staff and guests
- ✓ Quickly and effectively destroys harmful germs
- ✓ Low to NO VOC
- ✓ Intuitive controls
- ✓ Eliminates user errors that arise from needing to mix chemicals
- ✓ Eliminates need for storing large amounts of chemicals
- ✓ Configurable for large volume users

Where is it used?

GenEon's InstaFlow can support a wide variety of industries including:

Janitorial, Environmental Service, Veterinary, Food Service, Medical/Healthcare, Commercial Food Production, Dairy Production, Hospitality/Lodging/Cruise Ships, and many more.

InstaFlow

How it works

GenEon Technologies' line of Electro Chemical (ECA) On-Site Generators changes the landscape for the development of safe, sustainable, budget-friendly and highly effective cleaners, sanitizers & disinfectants. Solutions created by ECA technology and GenEon are recognized worldwide to be sustainable, more effective and safer than traditional toxic chemicals and disinfectants.

Clean

Glass & General Purpose

When the Glass and General Purpose Catalyst is activated it produces a cleaner that is effective as the leading Glass and General Purpose Cleaners per TURI. Item #: SUP15

- Glass & Mirrors
- Counter Tops
- Stainless Steel

Note: GenEon™ InstaFlow On-Site Generator is considered to be a device per 40 CFR 152.500 and thereby is exempt from FIFRA registration by the U.S. E.P.A.

What users are saying...

"We installed our first InstaFlow a little over two months ago. We held a meeting with both groups after the 2 month mark. Our in-house staff loved all the solutions (couldn't say enough about the glass cleaner) and said that the InstaFlow solutions performed better than the chemicals we were previously using. The contracted staff supported the claims of our in-house staff; they love the solutions. Our in-house staff also commented on how the solutions didn't dry their skin out."

Richard Ernst, Director - Facilities Maintenance & Operations, Atlanta Public Schools
