AIR & SURFACEPRO

This small but powerful surface and air purifier uses our patented ActivePure® Technology to eliminate contaminants on surfaces and in the air, without the use of ozone, and reducing the odors caused by these contaminants.

WHAT'S POLLUTING YOUR HOME?

- VOCs
- Pollen, dust and dander
- Residue from household chemicals
- Mold and fungal spores
- Poor outdoor air quality
- Garbage cans
- Athletic clothing
- Cooking odors
- Pets

WHAT IT DOES

- New & Improved Patented ActivePure® Cell destroys over 99% of all surface and airborne contaminants faster
- Uses a UVC light to oxidize and ionize the air
- Reduces airborne contaminants and allergens that can trigger asthma and allergy symptoms
- Removes dirt and dust from the air
- Provides ozone-free air cleaning of surfaces and air

SO WHAT IS ACTIVEPURE® TECHNOLOGY?

ActivePure is based on technology originally developed by NASA. It is proven to reduce over 99% of surface micro-organisms and dramatically reduce airborne contaminants and allergens in the air.

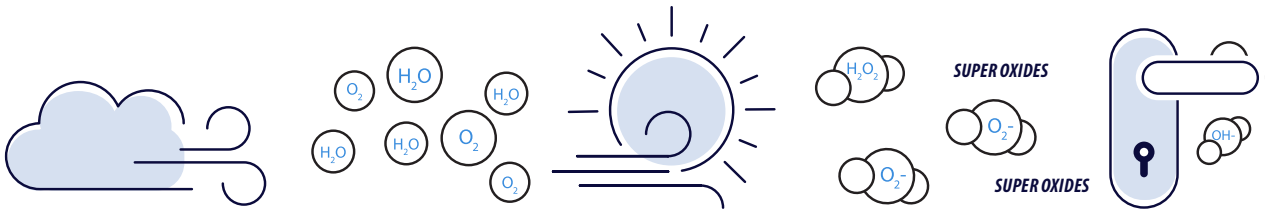
In 2017, ActivePure® Technology was inducted into the Space Technology Hall of Fame by The Space Foundation.

HOW ACTIVEPURE® WORKS

ActivePure has been tested in independent labs and proven to reduce and eliminate viruses, bacteria, mold and fungi on surfaces and in the air.

It works by harnessing microscopic oxygen and water molecules in the air that then go through our purification units, which are equipped with an ActivePure honeycomb matrix.

While inside the matrix, the molecules are transformed into friendly-yet-powerful oxidizers. As they're released back into the air, these supercharged ActivePure molecules seek and rapidly destroy contaminants, fungi, mold, and odor-causing bacteria – even ones that try to hide in hard-to-reach places.



Oxygen and humidity are converted into oxidizers

Using a process similar to natural sunlight
